WONSEN ENTERPRISE
Pharmaceutical Solid Preparation Equipment Solutions

WONSEN ENTERPRISE
Modern industrial park

BRIEF INTRODUCTION

Yichun Wanshen Pharmaceutical Machinery Co., Ltd. was founded in September 2010. Wonsen are the state-level high-tech enterprise, specializing in the research, development, production, sales and service of pharmaceutical equipment and intelligent information system. It provides the global customers with turn-key solution of solid dosage equipment and information management system to make powder, granule, capsule, tablet, etc. Wonsen takes the initiative to combine the solid preparation equipment with the Internet technology. And now Wonsen has become an important industrial base for solid preparation equipment and intelligent information system in China. The machines are sold to many famous domestic users and Europe, the United States, CIS, the Middle East, Southeast Asia and other more than 30 countries and regions.

Our company covers an area of 93,000 square meters, with industry-leading industrial design centers and digital test experience centers built according to EU GMP standard. It has successively cooperated with Zhejiang University, Hunan University, Jiangxi University of Traditional Chinese Medicine and Nanchang University.

Our company takes intelligent information management and lean production site management, carries forward the enterprise spirit of "being humanistic, unremitting, pragmatic, innovative, and keeping exceeding", and advocates the business philosophy of "pursuing high quality, creating value for customers and creating benefits for our company". Adhering to the enterprise style of diligence, pragmatism, trustworthiness and striving for success, it is committed to build a world-class health industry equipment group.

WONSEN ENTERPRISE

Experienced
Professional
All-round service
Problem solver

OFFICE ENVIRONMENT

Wonsen offers employees a platform for creating wealth and happy life. Wonsen respects every employee and holds the concept that talents are the first wealth of our company. Oriented by performance, Wonsen helps employees realize self-value through fair and just competition. Wonsen has created a harmonious and friendly working atmosphere with humanistic enterprise management and sound corporate culture.

ENTERPRISE HONORS

WONSEN ENTERPRISE

Sincerity constructs harmony and wins honors.

VERSATILE STAFF

God rewards those who work hard, it is you who cast Wonsen today with diligence, dedication, writes a new chapter with youth and passion.

INNOVATIVE TEAM

Innovation is the engine for survival and development of enterprise and is the base of corporate cultural spirit of Wonsen. Wonsen is always striving to build an innovative environment, introduce a competition system, enhance innovative conception and improve innovative ability of employees. Our enterprise pays much attention to information orientation, and applies new knowledge and advanced technology into updating product. The research and development ability has been increasingly enhanced, and Wonsen has been more vigorous with new products and technology emerging.

WORKSHOP

Lean management

The strict workshop site management, 6S location management and various operation rules for safe production have become driving force for the development of Wonsen. Wonsen is continuously intensifying the research, development and innovation of core technology, pursuing prominence and keeping improving, ensuring the excellent performance of every single product by advanced production equipment, strict quality control and precise production and inspection procedures.

PRODUCTION FACILITIES

The basis of market competition is inseparable from the improvement of equipment and facilities. In order to manufacture high quality pharmaceutical equipment, Wonsen constantly introduces advanced high-precision production equipment from home and abroad, leading the development of industrial modernization.

WONSEN ENTERPRISE

Strong technology and exquisite equipment

WONSEN ENTERPRISE
Wonsen is your most trustworthy partner

CUSTOMERS

Faithful customers are the base for Wonsen to survive. "Being sincere, faithful, pioneering and enterprising" is the marketing concept that Wonsen always abides by, and it is our goal to seek for mutual progress with customers.

ENGINEERING CASES

Wonsen has a professional after-sales team with solid theoretical knowledge and rich installation experience. With enthusiasm and active working attitude, we not only provide users with installation, debugging, training, warranty and lifelong service, but also assist users to formulate and optimize process parameters to meet the diverse needs of users.

PROCESS FLOW CHART

WONSEN ENTERPRISE

Scientific, professional and elaborate manufacturing is perfectly expressed in every procedure.

Wet type granulation production line

Dry type granulation production line

Dust-free batching production line

PRODUCT CONTENTS

Solid Preparation Granulation Production Line

- 22 Closed Granulation Line

Wet Type Series

- 23 SHLG High Shear Mixer Granulator
- 24 SHL Rapid Mixer Granulator
- 25 SHLS Lab Rapid Mixer granulator

Fluidized Bed Series

- 26 FL Fluid Bed Granulator
- 27 FG Fluid Bed Dryer
- 28 DPL Multifunctional Fluid Bed Granulator
- 29 DPLS Lab Multifunctional Fluid Bed Granulator

Cone mill series

- 30 JTZ Lifting Turnover Dry Cone Mill
- 31 ZLZ Lifting Vacuum Dry Cone Mill
- 32 FZM Grinding Dry Cone Mill
- 33 ZLJ Moveable Multi-mill

Dry Method Series

- 34 LG Roller Compactor

Blender Series

- 35 ZTH Automatic Lifting Bin Blender
- 36 HF Square Cone Bin Blender
- 37 HLT Single Column Lifting Bin Blender
- 38 HLS Lab Bin Blender

Coating Series

- 39 BGB-F High-efficiency Coating Machine
- 40 BGB-D High-efficiency Coating Machine
- 41 BGB-S Lab Coating Machine
- 42 BGB-M Containment Coating Machine

Lifting Series

- 43 YTG Fixed Lifting Machine
- 44 YTY Moveable Lifting Machine
- 45 CT Lifting Machine Among Floors

Cleaning Series

- 46 ZLXHD Multifunctional Bin Cleaning Machine
- 47 ZLXHS Double Chamber Bin Cleaning Machine
- 48 QXY Moveable Cleaning Machine
- 49 ZQX Auto CIP Machine
- 50 QXD Vertical Bin Cleaning Machine

Bin Series

- 51 IBC Bins
- 52 Accessories

Closed Granulation Line

YouTube QR Code

Application

The closed granulation line has the functions of granulating, drying and cone mill. It is mainly used for powder granulation in the pharmaceutical, food, chemical and other industries.

Features

- ▲ Wall mounted design, space saving
- ▲ Closed transferring, improving operation efficiency and reducing the risk of material exposure
- ▲ Can set for batch continuous automatic production, making the production process more in line with GMP requirements
- ▲ Process control and PAT
- ▲ CIP cleaning
- ▲ Control system can optionally complying 21CFR Part11 requirements

Technical Parameter

Item	Model	60	120	200
Production capacity (kg/batch)		15-60	50-120	120-200

Note: Our company can customize products according to user requirements.

High Shear Mixer Granulator

YouTube QR Code

Application

It has many functions such as mixing, granulating, wet cone mill, etc. It has been widely used in pharmaceutical, food, chemical industry, etc.

Features

- ▲ Higher working platform, better for connecting with FBD to discharge
- ▲ Compact structure
- ▲ Tangential impeller
- ▲ WIP system
- ▲ Good reproducibility
- ▲ Can connect with fluid bed dryer to form a fully closed granulating production line
- ▲ Fully meet FDA,CGMP,GMP
- ▲ Control system can optionally complying 21CFR Part11 requirements

Rapid Mixer Granulator

Application

It has many functions such as mixing, granulating, etc. It has been widely used in pharmaceutical, food, chemical industry, etc.

Features

- ▲ Lower working platform, mainly suitable for lower room height
- ▲ Compact structure
- ▲ Tangential impeller
- ▲ WIP system
- ▲ Good reproducibility
- ▲ Can connect with fluid bed dryer to form a fully closed granulating production line
- ▲ Fully meet FDA,CGMP,GMP
- ▲ Control system can optionally complying 21CFR Part11 requirements

Lab Rapid Mixer Granulator

Application

The machine is mainly suitable for small batch granulation process in the R&D. The powder material and the binder are mixing at high speed by the mixing impeller inside the granulating pot, and then cutting into uniform wet granules by the side high speed chopper. The purpose of the granules is one of the process equipment commonly used in the production of solid preparations in the pharmaceutical industry, and is widely used in the pharmaceutical, food, chemical and other industries.

Features

- ▲ Movable with heavy duty wheels, with brake
- ▲ Compact structure and space saving
- ▲ Good reproducibility and safety interlocking system
- ▲ With interchangeable granulating pots for different capacity
- ▲ Can optionally with transparent glass pot lid for better viewing
- ▲ Fully meet FDA,CGMP,GMP
- ▲ Control system can optionally complying 21CFR Part11 requirements

Fluid Bed Granulator

YouTube QR Code

Application

The machine is a process machine widely applied for solid preparation production in the pharmaceutical industry. It has mixing, drying, granulating functions. It is also widely used in such industries as medicine, chemical industry, food, etc.

Features

- ▲ With top spraying system for granulation
- ▲ Two heating modes alternative, such as electric heating or steam heating
- ▲ PID precision control
- ▲ High processing efficiency, with closed online sampling
- ▲ Ex-proof system/anti-10 or 12 bar/final dedusting system/dehumidifier system are available
- ▲ WIP system/PAT are available
- ▲ Fully meet FDA, CGMP, GMP
- ▲ Control system can optionally complying 21CFR Part11 requirements

Multifunctional Fluid Bed Granulator

Application

The machine is a process machine widely applied for solid preparation production in the pharmaceutical industry. It has mixing, drying, top granulating and bottom coating functions. It is also widely used in such industries as medicine, chemical industry, food, etc.

Features

- ▲ With top spray for granulating and bottom spray for pellet coating
- ▲ Two heating modes alternative, such as electric heating or steam heating
- ▲ PID precision control
- ▲ High processing efficiency, with closed online sampling
- ▲ Ex-proof system/anti-10 or 12 bar/final dedusting system/dehumidifier system are available
- ▲ WIP system/PAT are available
- ▲ Fully meet FDA, CGMP, GMP
- ▲ Control system can optionally complying 21CFR Part11 requirements

Lifting Turnover Dry Cone Mill

Application

The machine is mainly used for dry cone milling, transferring, discharging solid materials, can be matched with FBG or FBD bowls. It has been widely used in pharmaceutical, food and chemical industry.

Features

- ▲ Labor saving and efficient process flow
- ▲ Less material loss and minimum damage to granules
- ▲ Can be connecting with FBD bowl and transferring and discharging automatically
- ▲ On-line cone mill solution
- ▲ Hermetical gravity discharging solution at various height by lifting system
- ▲ Button panel control

Lifting Vacuum Dry Cone Mill

Application

The machine is mainly used for vacuum conveying, dry cone milling, discharging solid materials. It has been widely used in pharmaceutical, food and chemical industry.

Features

- ▲ Labor saving and efficient process flow
- ▲ Dust free and no cross contamination
- ▲ Integrated with vacuum conveyer
- ▲ Can be closed vacuum connecting with FBD and transferring and discharging automatically
- ▲ On-line milling solution
- ▲ Hermetical gravity discharging solution at various height by lifting system
- ▲ HMI and PLC auto control

Grinding Dry Cone Mill

Application

The machine is mainly used for dry cone milling solid materials. It has been widely used in pharmaceutical, food and chemical industry.

Features

- ▲ Labor saving and efficient process flow
- ▲ Easy control of granule size
- ▲ Easy to clean and no overheating of materials
- ▲ Little dust and low noise
- ▲ High efficiency and energy saving
- ▲ Moveable design

Moveable Multi-mill

Application

The machine uses the high-speed relative movement between the rotor and the screen to quickly mill the lump-shaped materials under the rollers and pass through the sieve holes to form granules. The finished granules are discharged instantaneously. The frequency conversion speed regulation is adopted, and the spindle speed is adjustable. The range is wide, the lower drive is adopted, and the feeding is smooth. It can be used with high shear mixer granulator and fluid bed dryer respectively.

Features

- ▲ Optional with lifting device for ±100mm to connect with high shear mixer granulator
- ▲ Available for both wet and dry cone mill
- ▲ It can be equipped with a quantitative feeding mechanism to improve the consistency of granule size
- ▲ The opening of the screen hole is as small as $\phi 0.4\text{mm}$, the opening rate is high, and there is no dead corner
- ▲ The cone mill granule size is fine, and the material passing rate is high
- ▲ Effectively reduce the occurrence of material heating and is easy to clean
- ▲ With movable wheels with brake

Roller Compactor

YouTube QR Code

Application

Roller compactor adopts continuous loading and discharging, integrates the compacting, cutting and granulating mill functions, directly makes powder into granules. It is especially suitable for granulation of materials which are thermo-sensitive and humidity sensitive, easily broken down or agglomerated. It has been widely used in pharmaceutical, food, chemical and other industries. In the pharmaceutical industry, granules made by the roller compactor can be directly pressed into tablets or filled into capsules.

Features

- ▲ 3 functions in one unit: compacting, cutting, granulating mill
- ▲ Simplified process to obtain highly stable granules. No water or other liquid is added and no need drying, so the loss of active ingredients due to decomposition can be eliminated
- ▲ Rollers with a water circulating cooling system
- ▲ Rollers available with different types: smooth, anilox, curl
- ▲ Overall modular design, compact structure, better space utilization
- ▲ The power area is separated from the work area to prevent cross contamination
- ▲ Horizontal screw feeding structure, exposed installation of compacting roller system, easy to clean&maintain
- ▲ With vacuum air exhaust for feeding system
- ▲ Fully meet GMP requirements
- ▲ Control system complying 21 CFR Part 11 requirements

Automatic Lifting Bin Blender

YouTube QR Code

Application

The machine is provided with such functions as automatic lifting, mixing, positioning, etc. One bin blender can be with interchangeable mixing bins of different specifications, it can meet the mixing requirements of different batches and diversified varieties of products. It is an ideal machine for mixing in pharmaceutical plants. It is also widely used in such industries as medicine, chemical industry, food, etc.

Features

- ▲ Reasonable structure, stable performance, convenient operation, no need corners, and no exposed bolts
- ▲ With interchangeable mixing bins of different volume for various capacity
- ▲ The rotating body (mixing bin) symmetry plane is at an angle of 30° to the rotation axis. The material in the mixing bin rotate along with the rotating body and make tangential movement along the hopper walls, producing strong turning and high-speed tangential movement and achieving the best mixing effect
- ▲ It is provided with the infrared safety device and the discharging butterfly valve with misoperation preventer to ensure safe production
- ▲ One machine can be equipped with interchangeable bins of various specifications
- ▲ This machine is equipped with multiple safety interlocking mechanisms
- ▲ The machine effectively controls dust pollution and cross contamination, reduces loss of Material, controls material layering, optimized production processes
- ▲ Meet GMP requirements
- ▲ Adopt HMI and PLC auto control system, can optionally comply 21 CFR Part 11 requirements

Square Cone Bin Blender

YouTube QR Code

Application

This machine is developed in combination with the characteristics of a variety of mixers and is suitable for a wide range of mixers. It fully meets GMP requirements and other relevant industry standards. It is especially suitable for the mixing process of products with relatively single varieties and large batch sizes. Such as: pharmaceutical, food, dairy, chemical reagents and other solid preparation industries.

Features

- ▲ With reasonable design, compact structure, can reach mixing uniformity 99% and 80% max loading coefficient
- ▲ It has such features as high rotation height, stable running, reliable performance and easy operation
- ▲ Easy discharging and cleaning, no dead corners and without cross contamination
- ▲ Suitable for large production capacity, simple operation
- ▲ With fixed bin, stable running
- ▲ Meet GMP requirements
- ▲ Adopt HMI and PLC auto control system, can optionally comply 21 CFR Part 11 requirements

Single Column Lifting Bin Blender

YouTube QR Code

Application

The single-column lifting bin blender is widely used for mixing different components of powders with powders, powders with granules and granules with granules in the production procedure in the pharmaceutical industry. The machine is provided with such functions as automatic lifting, mixing, falling, etc. It can be equipped with various specifications of bins for mixing operation. It is suitable for mixing materials of different varieties and different batches in large and medium-size pharmaceutical enterprises according to process requirements. Multiple purposes can be realized in one machine.

Features

- ▲ Single column, saving space, with compact structure, stable and reliable operation
- ▲ With interchangeable mixing bins of different volume for various capacity, improving the efficiency, avoiding cross contamination
- ▲ The mixing uniformity is over 99%, the loading coefficient is 0.8 and the bin is easy to clean, no dead corner
- ▲ Meet GMP requirements
- ▲ Adopt HMI and PLC auto control system, can optionally comply 21 CFR Part 11 requirements

Lab Bin Blender

Application

It is mainly used for R&D mixing different components of dry powders with dry powders, granules with granules, or powders with granules. It is an ideal machine for exploring the best process parameters in material mixing, and an advanced mechanically and electrically integrated lab machine

Features

- ▲ R&D scale
- ▲ With reasonable design, compact structure, space saving
- ▲ With movable wheels with brake
- ▲ With interchangeable mixing bins for various capacity
- ▲ Adopt HMI and PLC auto control system, can optionally comply 21 CFR Part 11 requirements

High-efficiency Coating Machine

YouTube QR Code

Application

The new type auto coating machine is designed for coating process solutions for all kinds of tablets, pills, granules, which can promote the coating production efficiency and guarantee material stability. Reliable process, interchangeable pan design, CIP design and good appearance conform to the requirements of GMP. Varieties of functions make the batch production time shorten, Satisfying different process requirements. It is the best choice for film coating, sugar coating.

Features

- ▲ Overall open design on the front side
- ▲ Easy cleaning, no dead corner
- ▲ Wide install area and maintenance space and pans can be replaceable
- ▲ Unique airbag seal structure, fully enclosed chamber
- ▲ It adopts HMI and PLC automatic control system, can optionally comply 21 CFR Part 11 requirements

Tipping lifting feeder

- ▲ Achieving smoothly loading tablet into the coating pan
- ▲ Prevent fragments and bracts because of the height difference colliding
- ▲ Auto lifting and tipping, the tablets can slide into the coating pan evenly and slowly

High-efficiency Coating Machine

Application

The BGB-D coating machine is mainly used in medicine and food industries. Meeting GMP requirements, it is a kind of mechanically and electrically integrated coating equipment with high efficiency, energy conservation, good safety and good cleanliness for organic film coating, water soluble coating, dripping pill coating, sugar coating, chocolate and candy coating.

Features

- ▲ The streamlined diversion plate improve the rate of finished products, reducing broken edges. The narrow upper surface of the diversion plate design improve the adhesion of excipient, saving the excipient and improving medicine quality.
- ▲ The constant pressure variable peristaltic pump is used to replace the return flow. The rotation radius of the pan changes with the change of pressure, the output solution and spray volume are automatically balanced, the spray system is optimized, the blocking of the spray gun is avoided, the excipient is saved. Easy to clean without any dead corners.
- ▲ It adopts the new type spray gun with even atomizing, large spraying area, adjustable direction. The nozzle is not affected by the loading volume, the anti-blacked device can ensure continuous coating, shorten coating time and save coating excipient.
- ▲ Easy and fast for charging and discharging
- ▲ Both film coating and sugar coating are available
- ▲ Ex-proof system/ dehumidifier system / CIP system are available
- ▲ It adopts HMI and PLC automatic control system, can optionally comply 21 CFR Part 11 requirements.

Lab Coating Machine

Application

The BGB-S coating machine is mainly used in medicine and food industries. Meeting GMP requirements, it is a kind of mechanically and electrically integrated coating equipment with high efficiency, energy conservation, good safety and good cleanliness for organic film coating, water soluble coating, dripping pill coating, sugar coating, chocolate and candy coating.

Features

- ▲ Suitable for R&D scale
- ▲ Interchangeable coating pans can be replaced according to the different batch size
- ▲ Easy operation of replacing the interchangeable coating pans
- ▲ With compact and integrated structure, air intaking at the clean area, saving space
- ▲ With movable heavy duty wheels with brake
- ▲ It adopts HMI and PLC auto control system, can optionally comply 21 CFR Part 11 requirements

Containment Coating Machine

Application

The containment coating machine is mainly suitable for tablet coating of API materials. The isolation system ensures the safety of operators, materials and environment, and realizes multiple coating process.

Features

- ▲ Containment coating process, complying OEB4 and OEB5
- ▲ Lighting: illuminance≥300lx
- ▲ Reserving detection port of dust particle, floating bacteria and sedimentation bacteria
- ▲ Reserving port for sterilization
- ▲ WIP misting system
- ▲ Push-push filter for getting rid of dust
- ▲ Interchangeable coating pans can be replaced according to the different batch size
- ▲ It adopts HMI and PLC automatic control system, can optionally comply 21 CFR Part 11 requirements

Fixed Lifting Machine

YouTube QR Code

Application

The machine is mainly used for conveying and loading solid materials in the pharmaceutical industry. It can work with the mixer, tablet pressing, capsule filling, packing machines, etc. It is also widely used in such industries as medicine, chemical industry, food, etc.

Features

- ▲ With fixed and positioning design, safe and stable performance
- ▲ Special design to loading materials for tablet pressing, capsule filling and packing machines
- ▲ Ease for lifting IBC bins to loading in a closed system
- ▲ Anti-falling device
- ▲ Labor saving
- ▲ It can turn 180°
- ▲ Hydraulic and electric lifting are alternative
- ▲ Electric lifting model can adopt HMI and PLC control system, can optionally comply 21 CFR Part 11 requirements

Technical Parameter

Model	Lifting type	Max net loading(kg)	Power(kW)	H	H1	L
YTG-200	Hydraulic	200	3	Designed according to URS		
	Electric		2			
YTG-300	Hydraulic	300	3

Note: the above motor power is determined according to the actual situation (lifting height, net loading)

Moveable Lifting Machine

Application

The machine is mainly used for conveying and loading solid materials in the pharmaceutical industry. It can work with the mixer, tablet pressing, coating machine, capsule filling and packing machines, etc. It is also widely used in medicine, chemical, food industries and so on.

Features

- ▲ With movable design
- ▲ Special design to loading materials for coating and packing machines
- ▲ Ease for lifting IBC drums to loading in a closed system
- ▲ Anti-falling device
- ▲ Labor saving
- ▲ It can rotate IBC drums 180° to discharge
- ▲ Hydraulic and electric lifting are alternative

Technical Parameter

Model	Lifting type	Net load (kg)	Power (kW)	H	L
YTY-100	Hydraulic	100	1.5	Designed according to user requirements	
	Electric				
YTY-150	Hydraulic	150			
	Electric				

Note: Our company can customize products according to user requirements.

Lifting Machine Among Floors

Application

The machine is mainly used for transferring among floors of the solid materials (bags or bins) in the pharmaceutical industry. The machine effectively reduces cross contamination of dust, lower labor intensity and fully meets GMP requirements for medicine production. It is an ideal material conveying machine used in pharmaceutical, chemical, and food industries.

Features

- ▲ Special design for material transfer among different floors
- ▲ Safe and stable performance
- ▲ Labor saving
- ▲ Anti-falling system and safety lock
- ▲ Provided with overload self-protection function and alarm indication function

Technical Parameter

Model	Net load(kg)	Hydraulic station volume (L)	Hydraulic station power (kW)	H	H1	W	L

Multifunctional Bin Cleaning Machine

Application

The ZLXHD series bin cleaning machine is mainly used for cleaning stainless steel drums, IBC mixing and transferring bins in pharmaceutical, chemical, food and so on industries.

The ZLXHD series bin cleaner can effectively clean foreign matters remaining on the inner and outer surfaces of the bin to avoid cross contamination of various ingredients during the production. It is an indispensable machine in pharmaceutical enterprises. It is also one of the necessary equipment for pharmaceutical enterprises to meet the requirements of GMP in the production process of solid pharmaceutical preparations.

Features

- ▲ Providing uniform cleaning standard for the cleaning bins and easily making the traceability and certification of the cleaning process
- ▲ Improving the production efficiency
- ▲ Reducing labor intensity of workers
- ▲ Integrating cleaning, drying and cooling functions
- ▲ Adopting HMI and PLC control during the whole process, which is with high degree of automation and simple operation, complying 21CFR Part11 requirements

Technical Parameter

Double Chamber Bin Cleaning Machine

Application

The ZLXHS series double chamber bin cleaning machine is mainly used for cleaning stainless steel drums, IBC transferring and mixing bins in pharmaceutical, chemical, food and so on industries. The ZLXHS series double chamber bin cleaning machine can effectively clean foreign matters remaining on the inner and outer surfaces of the bin to avoid cross contamination of various ingredients during the production. It is an indispensable machine in pharmaceutical enterprises. It is also one of the necessary equipment for pharmaceutical enterprises to meet the requirements of GMP in the production process of solid pharmaceutical preparations.

Features

- ▲ With two chambers, one for cleaning, another for drying and cooling, which is more efficient
- ▲ Providing uniform cleaning standard for the cleaning bins and easily making the traceability and certification of the cleaning process
- ▲ Improving the production efficiency
- ▲ Reducing labor intensity of workers
- ▲ Integrating cleaning, drying and cooling functions
- ▲ Adopting HMI and PLC control during the whole process, which is with high degree of automation and simple operation, complying 21CFR Part11 requirements

Moveable Cleaning Machine

Application

With compact structure, convenient operation, good sealing performance and high adaptability, the moveable cleaning machine produced by our company is used for cleaning industrial equipment and other parts that require cleaning in medicine, food and fine chemical industries. It is a processing machine designed and manufactured in accordance with GMP requirements.

Features

- ▲ Equipped with three water pipe inlets for users to select. The water outlets can be connected to tees or crosses to clean several machines simultaneously, which is convenient and easy to operate.
- ▲ Equipped with a cleaning nozzle that can turn for 360° and a high-pressure water gun. The cleaning procedure can be completed through the operation by just one person.
- ▲ With movable wheels with brake
- ▲ Concise structure and easy installation and disassembly
- ▲ The stainless steel cover is optional
- ▲ Button panel and HMI&PLC control is alternative

Technical Parameter

Item	Model	QXY-5	QXY-10

Note: Our company can customize products according to user requirements.

Auto CIP Machine

Application

The machine is mainly used for online cleaning for equipment in the production process of solid preparations, used together with equipment such as fluid bed machine, coating machine and rapid mixer granulator. It is also suitable for the cleaning of industrial equipment such as pharmaceutical, food, fine chemicals, etc. It is a cleaning equipment designed and manufactured in accordance with GMP requirements.

Features

- ▲ Optionally equipped with SWHE heat exchanger, if users have no hot water source
- ▲ Optionally equipped with water storage tanks, if users have no enough water flow or pressure
- ▲ The outlet can be connected to several different equipment for online cleaning
- ▲ Cleaning procedures, processes, etc. can be set on the touch screen, with high degree of automation program, and the operation is simple, can optionally complying 21CFR Part 11 requirements

Technical Parameter

Item	Model	ZQX-5	ZQX-10

	W	900	950
	H	1850	1960

Note: Our company can customize products according to user requirements.

Vertical Bin Cleaning Machine

Application

This machine is mainly used for transferring and mixing bins cleaning in the production process of solid preparations. The lifting arm extends the cleaning ball into the bin for cleaning. It can be adapted to bins of different specifications and is an ideal equipment for bin cleaning.

Features

- ▲ Manual lifting and automatic lifting is alternative
- ▲ Suitable for cleaning IBC bins of different specification sizes
- ▲ HMI and PLC control, cleaning easily, can optionally complying 21CFR Part 11 requirements

Technical Parameter

Item	Model	QXD-5	QXD-10
